

OptoBERT™ OPB-X150

15 Gbps Bit-Error-Rate Tester (BERT)

Overview

The OPTELLENT OptoBERT™ OPBX150 is a cost-effective easy-to-use 15G bit-error-ratio tester (BERT) for testing components and systems in R&D and manufacturing environments. The OPBX150 incorporates an internal reference clock, a pattern generator, clock recovery circuits, and a BER analyzer, in one compact module that provides both electrical and optical interfaces at data rates up to 14.025 Gb/s. The OPBX150 is offered with an RS-232 or USB interface and a standard 2-year warranty.

An intuitive Graphical User Interface enables easy point-and-click operation. Software drivers are available for incorporating the OptoBERT into test automation suites using programs like LabVIEW, VisualBASIC, HP VEE.

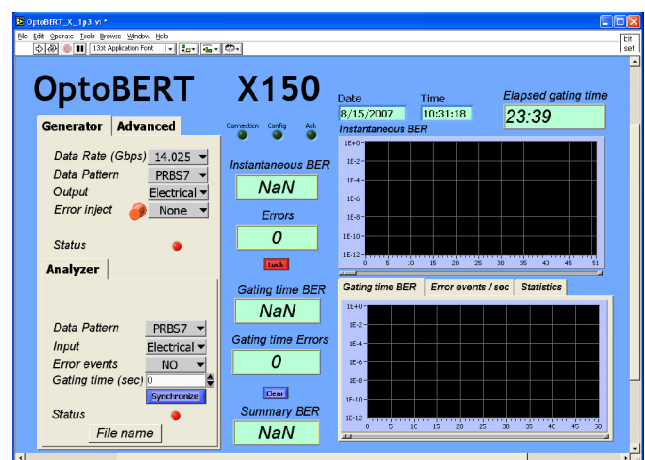

BER test data from the OptoBERT are output directly into a spreadsheet file without any programming.
